Subject: Request for Financial Support for Engineering New Zealand Membership

Kia ora <mark>[insert decision maker's name],</mark>

I have been reviewing the benefits and opportunities offered by Engineering New Zealand Te Ao Rangahau and would like to request your financial support for a membership.

An Engineering New Zealand membership offers numerous benefits to both myself as an engineer and our organisation:

1. **Enhanced Credibility**: Membership adds trust and credibility as our engineers are recognised professionals.
2. **Skill and Knowledge Development**: The membership provides opportunities to enhance my skills and knowledge, which I can apply directly to our organisation.
3. **Fostering Excellence**: Supporting professional memberships signals to all employees that the organisation values and invests in their growth. This can lead to higher job satisfaction, retention, and a culture of continuous improvement, which is vital for long-term success.
4. **Access to Resources**: Members have access to various workshops, seminars, courses, and resources crucial for career growth and staying updated with the latest industry trends.
5. **Networking Opportunities**: The membership offers numerous opportunities to connect with engineers across different fields for collaboration and sharing best practices.
6. **Professional Recognition**: The membership is a mark of professional recognition, demonstrating my commitment to maintaining high standards of engineering practice and ethics.

The annual membership fee starts at $237.50, which is reasonable given the immense value it provides. You can see the full list of fees associated with the membership here.

I would be happy to discuss this further or connect you with the Engineering New Zealand team. More information about the membership benefits can be found here.

Thank you for considering my request. I look forward to your positive response.

Ngā mihi nui,
